

Introduction to AV over IP Training

Just Add Power's Introduction to AV over IP Training provides you with the information and technical skills needed to design, install, configure, and troubleshoot a standardized Just Add Power AV over IP system.

This is an in-depth, **one-day class** that includes extensive **hands-on activities** with Just Add Power and networking equipment.

Training Overview:

- Configuring a VLAN System
- Static Routing
- Video and Audio Best Practices
- Endpoint Control and Integration
 - RS232
 - IR
 - CEC
- Feature Control and Integration
 - Video Wall
 - Tiling Layouts
 - Image Pull
- System Troubleshooting

Integrators completing this workshop may earn AVIXA RUs and CEDIA CEUs.

Attendees should bring:

- A Windows 8 (or better) PC with:
 - Native ethernet port or a USB-ethernet adapter
 - HDMI port
 - An open USB 2.0 port
 - (MacOS cannot run the software used in the class. MacOS is not supported)
